

Multi-vitamin Day Cream, 50ml

Day cream for face is intended for use on normal and sensitive skin. The added coenzyme Q10, an extremely potent antioxidant, and vitamins A, E, F, C contribute to nurturing and replenishing the skin, while also containing anti-aging properties. After use, your skin will be supple, soft and smooth to the touch and prepared for exposure to harsh conditions. Dermatologically tested.

Normal and sensitive skin.

Instructions for use: Apply the cream in the morning or throughout the day to a clean face, gently massaging the product into the skin. This product must not be consumed.
